

# Technical Data

# Volara<sup>®</sup> Type G

## PRODUCT DEFINITION

Volara type G foams are the most flexible, most conformable and softest to the touch offered by Sekisui Voltek. These products are also tough. Compared with other Volara foams at comparable density, type G foams offer higher tensile strength and greater elongation to break.

Type G foams get their flexibility and toughness from high VA content EVA copolymer they are made from. Applications for type G materials range from surgical drapes to high performance industrial mounting tapes.
